Abstract According to the debate on taking the way of "morpheme teaching" or teaching Chinese compound words "as a whole" in TCFL this paper puts forward that "lexical word" and "morphological word" should be distinguished the typical lexical word can be taught as a whole while the morpheme teaching method should be adopted for the morphological words. Further through the investigation and the analysis of the knowledge points of morphemes and word-formation in six grammar syllabus this paper points out that the morpheme teaching should be performed according to different classifications levels and stages and on the basis of morphemic meaning and morpheme category with the core of word-formation and structural meaning.

Key words morphological word lexical word morpheme teaching
